PERSONAL INFORMATION

I am a 4th-year computer engineering student, currently participating in the IT exchange program at Bay Atlantic University in Washington, D.C. My interest in computer concepts and electronic components played a significant role in choosing computer engineering, and I truly love my profession. I am problem-solving oriented and patient. I believe I have strong competence in information literacy. I have completed internships at two different companies and through these experiences, I have a strong sense of work discipline. In my free time, I do projects in different areas to improve myself.
